Vlaamse overheid

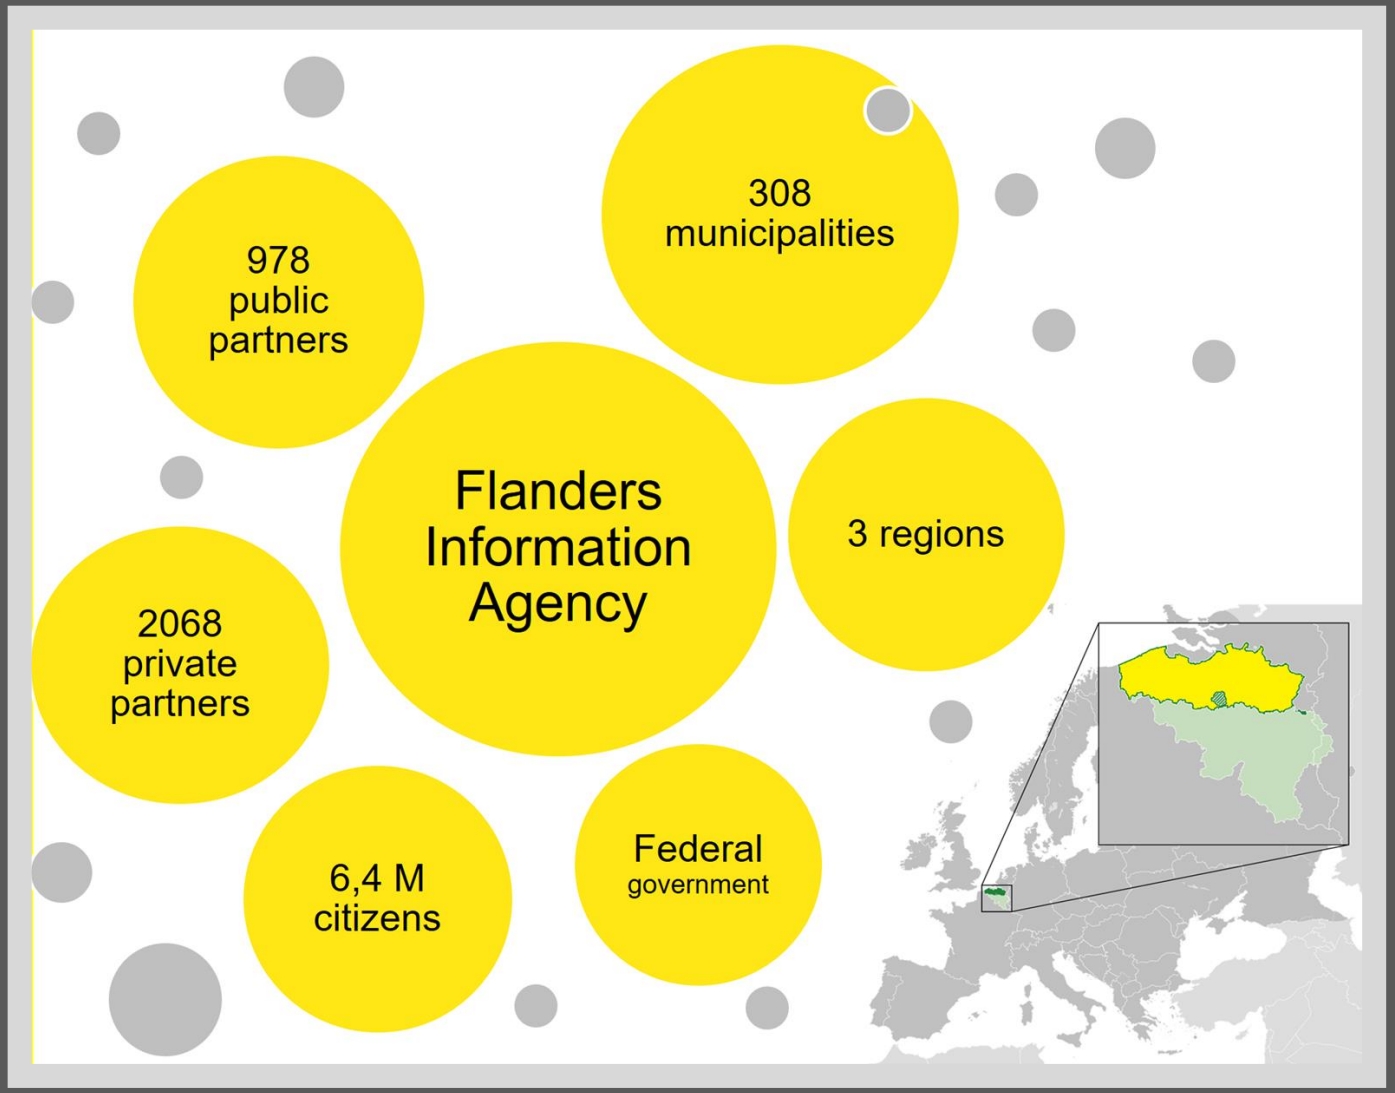

Open Standards for Linked Organisations [OSLO]

Interop Summit 2018 – Brussels

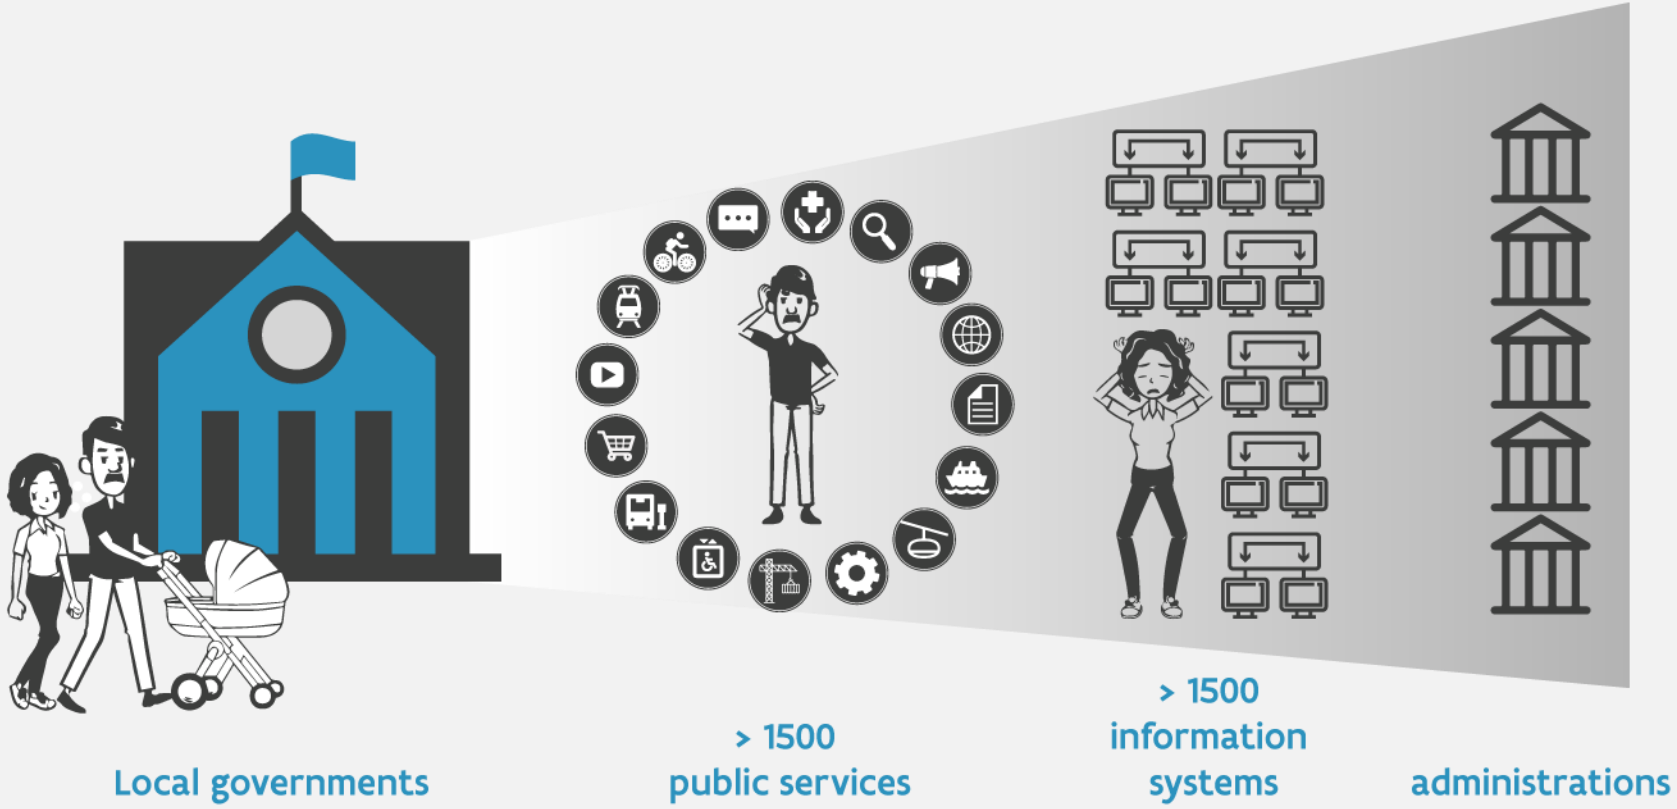

INFORMATIE VLAANDEREN

At the crossroads

Grassroots initiative

Motivation

applications look at the ‘real world’ from different perspectives

information is structured/modelled from one perspective

authoritative sources exist as independent silo’s

multiple investments for interlinking data

impact on the quality and the efficiency of public services.

Objectives

develop common standardisation methodology

create context neutral OSLO² semantic models

aggregate information from different national, regional and local egovernment information systems

create OSLO² enabled products (address LOD product)

"Now! ... *That* should clear up a few things around here!"

FarSide - Larson

Interoperability levels

gal interoperability
d digital friendly legislation

sational interoperability
ses by/for optimised data exchange

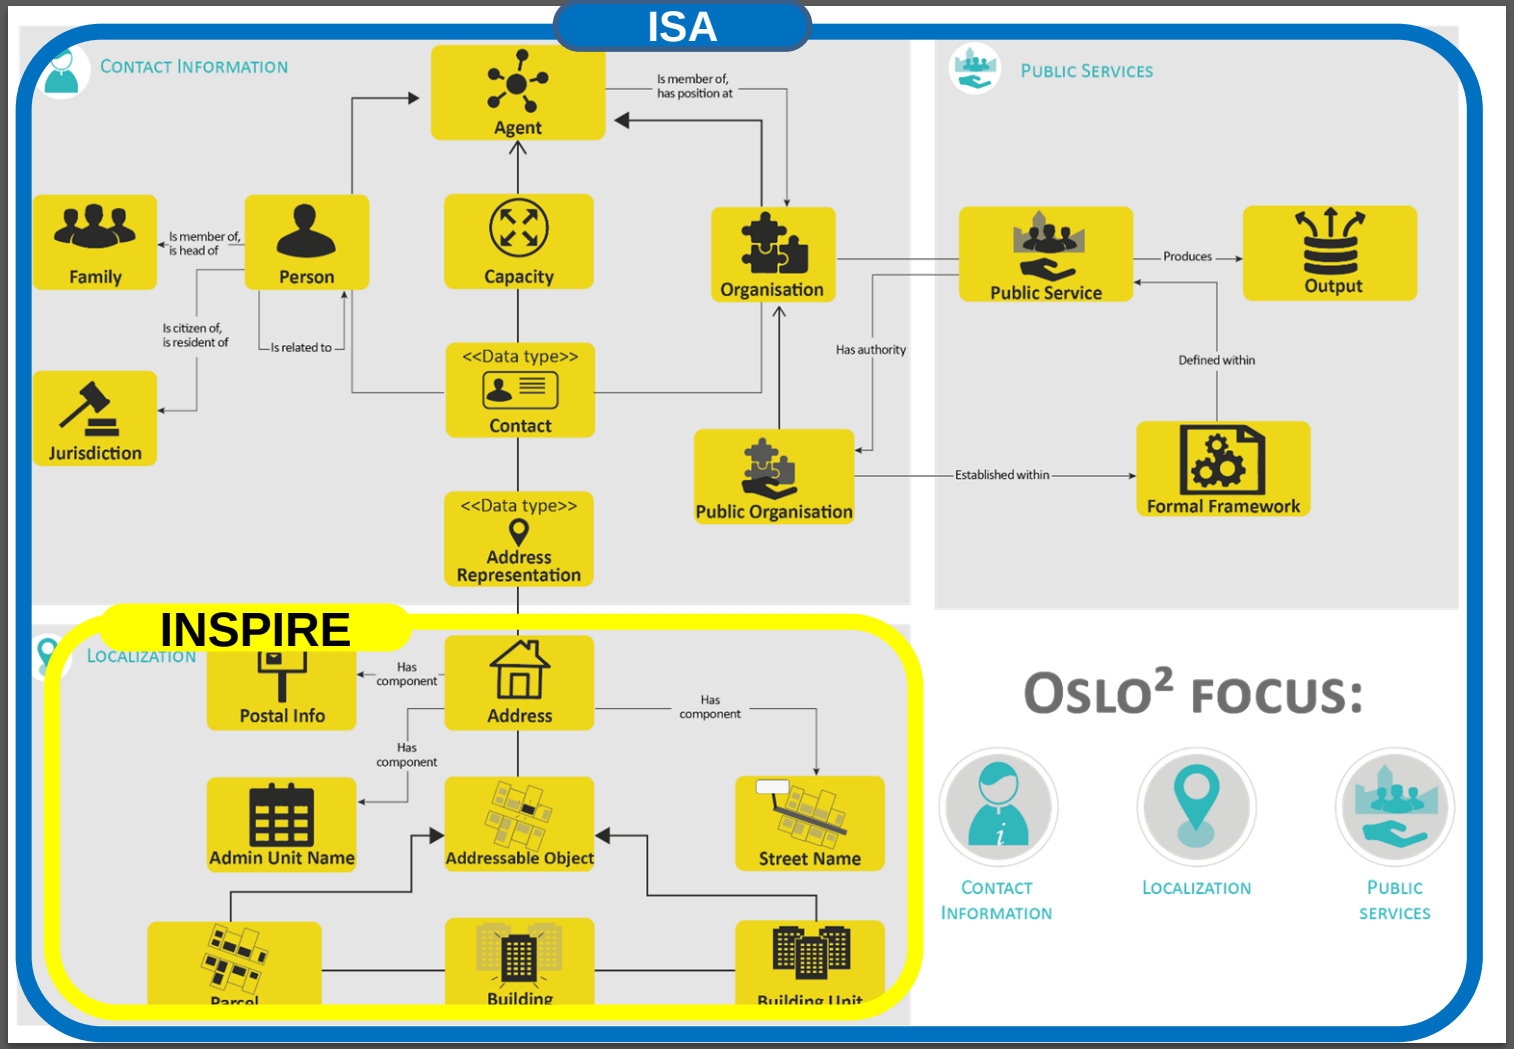

antic interoperability
e and appropriate use of information

ological interoperability
volved in linking computer systems

Political Context

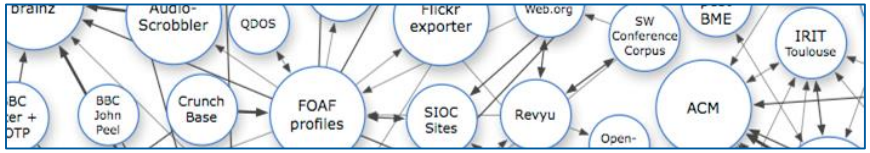

Political, cultural and structural conditions

At the heart of Public Service Delivery

Share and Re-use - ISA²

Semantic Interoperability

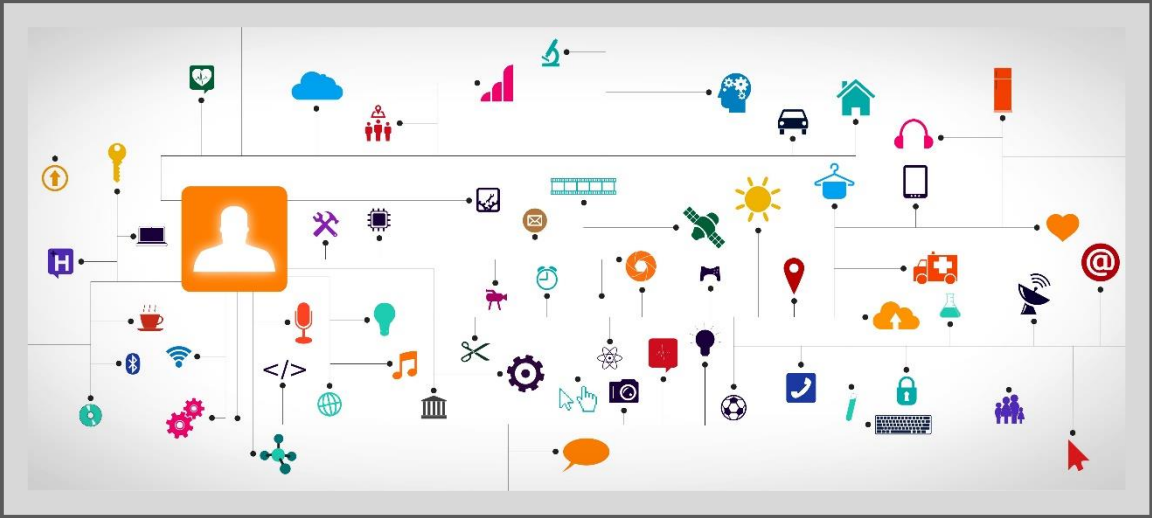

Technical Interoperability

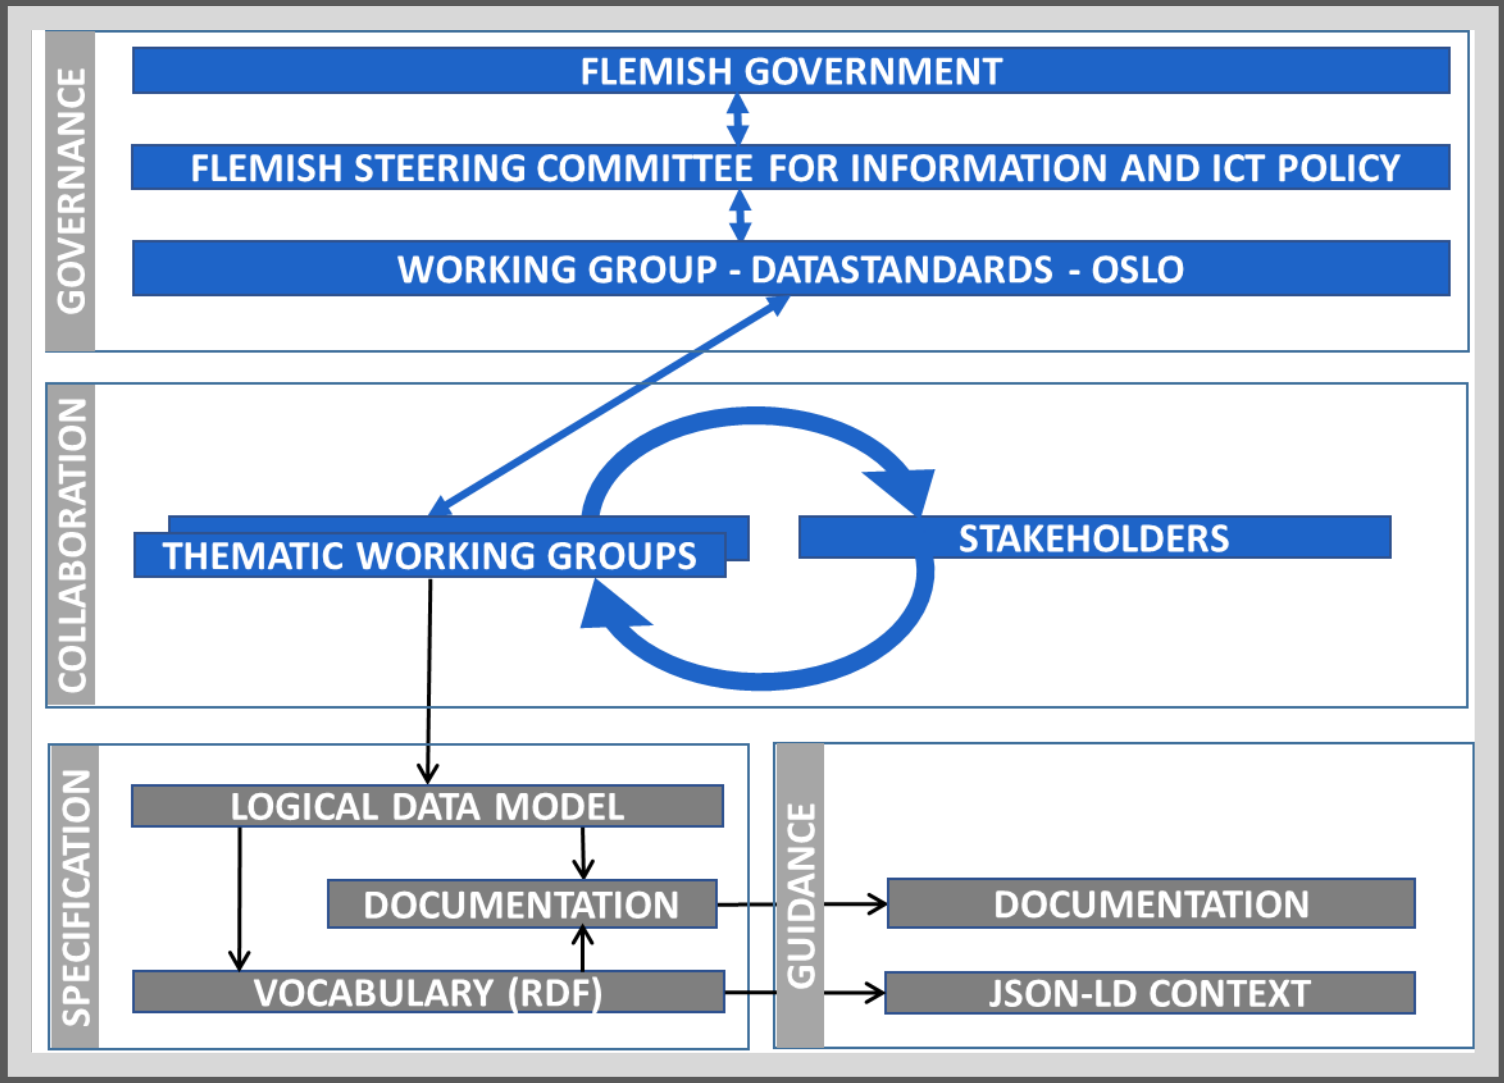

- *Bridging the gap between modelling and implementation*
- *Lowering the cost by using a generic connector*

http://bit.ly/isa_eu_ld

Collaborative Governance

Take away

ISA² CORE vocabularies facilitate interoperability

OSLO builds upon a Collaborative Governance

A generic connector lowers the cost for technical interoperability
