Interoperability on the local level

@BartRosseau
Chief Data Officer
City of Ghent

Interoperability

- Continuous Effort
- Synergy
- Neverending Story

Local interoperability

- City services
- Local Government Entitities
- Other Governments
- Private Sector
- Citizens

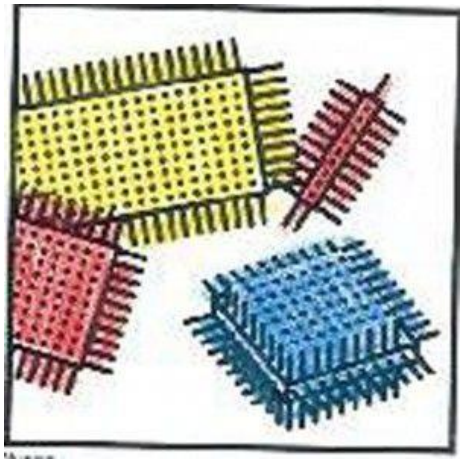

Interoperability of what?

- Data
- IT
- Standards
- Architecture
- Semantics
- Metadata

ORGANISATION CULTURE

Challenges

- Autonomy vs intergovernmental cooperation
- Policy goals: different priorities

Solutions?

- In a DECENTRALISED network
- Continuous collaboration (how many FTE's?)
- Pre- AND post procurement

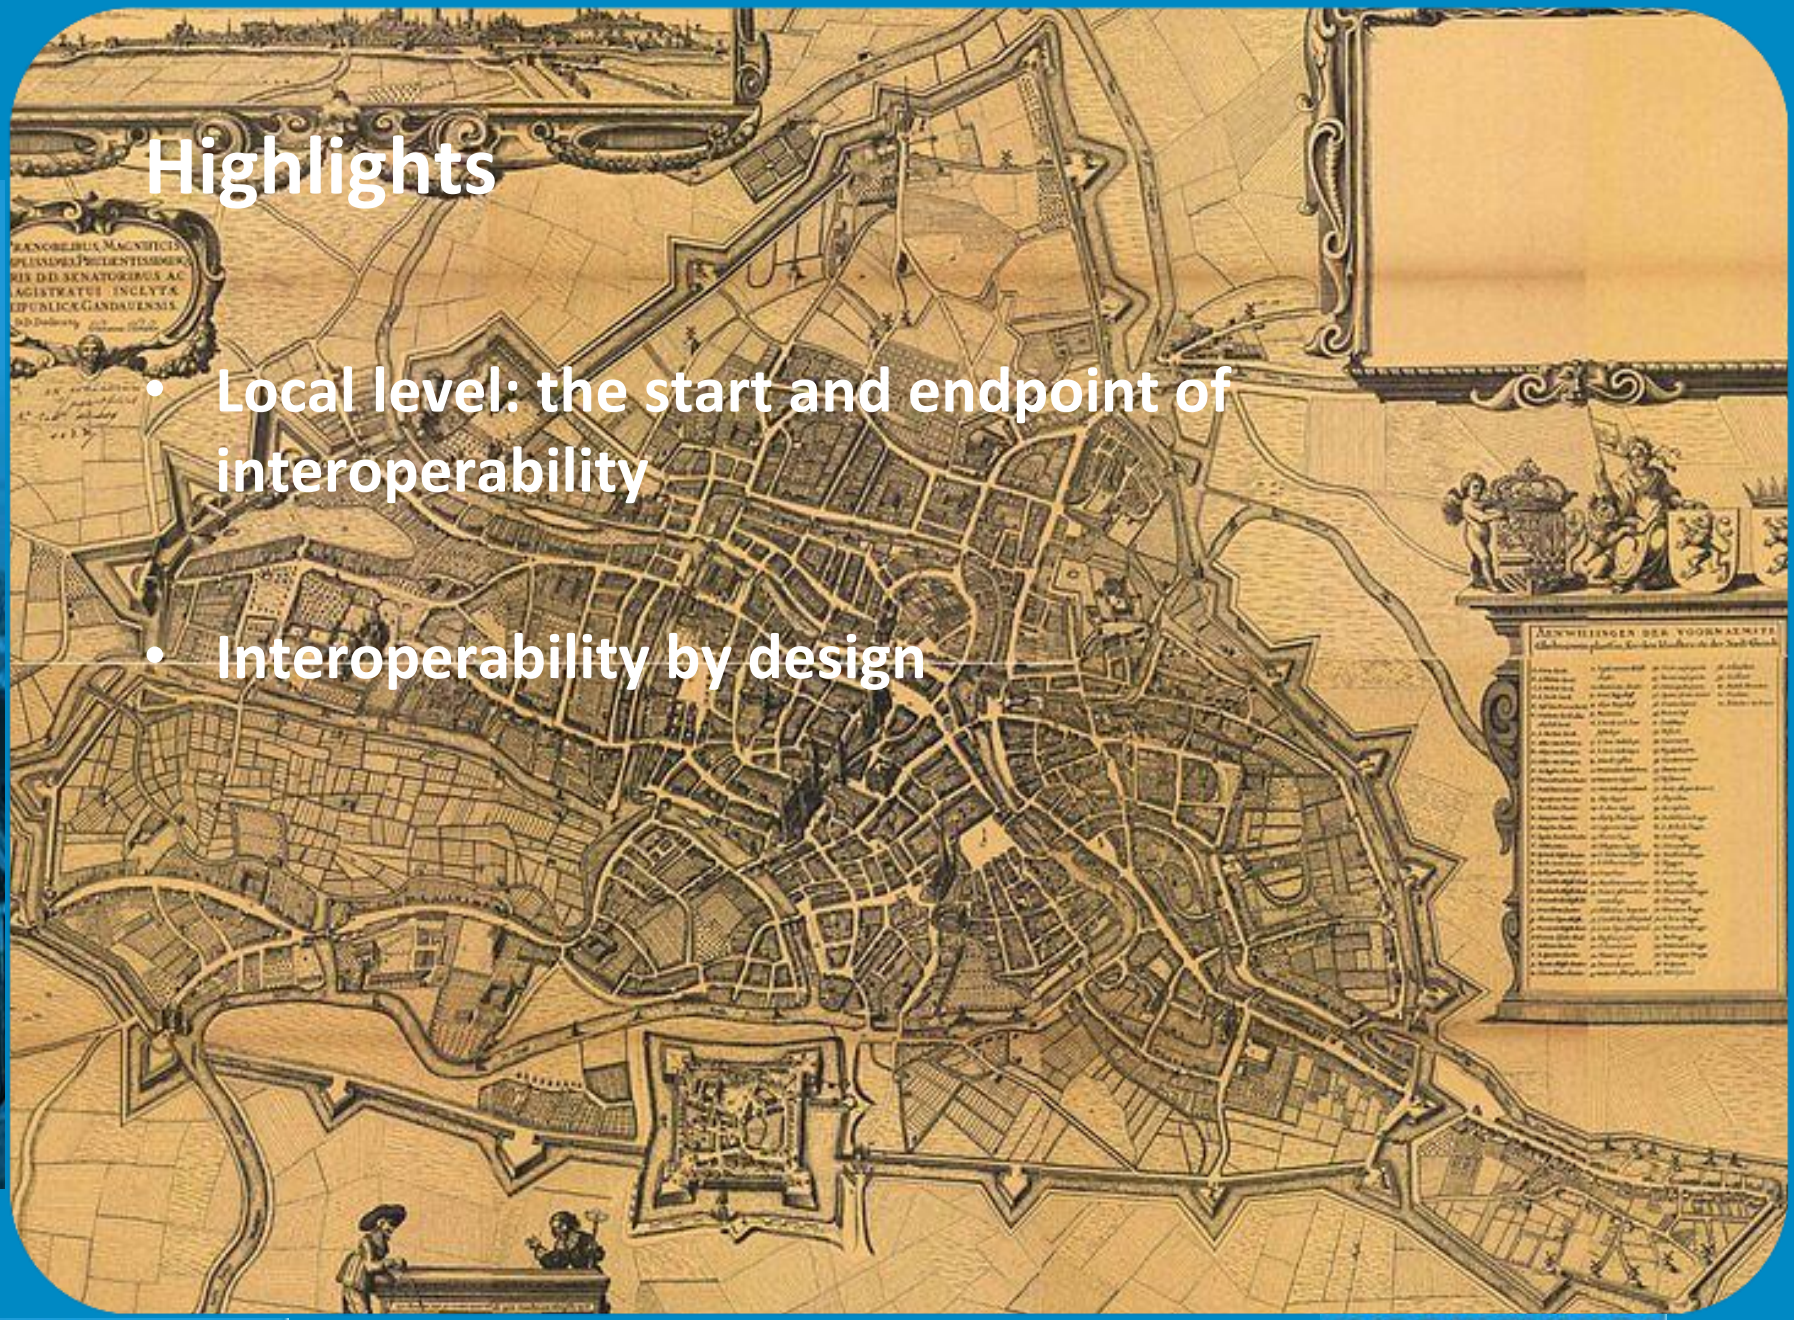

Examples

- ISA
- EIP Urban Platforms
- OSLO
- INSPIRE
- LOD
- Eurocities: Standards Working Group
- Open Data

- E.g. https://oasis.team/

Highlights

- Local level: the start and endpoint of interoperability
- Interoperability by design

Government role

- Skills of civil servants: recognise a good standard when you see one
- Avoiding vendor lockin

- Framework
- Compliance
- Leverage to market
