Challenges around bases registries

23/02/2018

BCED – Cédric Jeanmart

eWBS
e-Wallonie-Bruxelles Simplification

Agenda

- Interoperability for BCED
- Interoperability wishes (examples)
- Challenges
- Directions /Solutions

Interoperability for BCED

What is BCED?

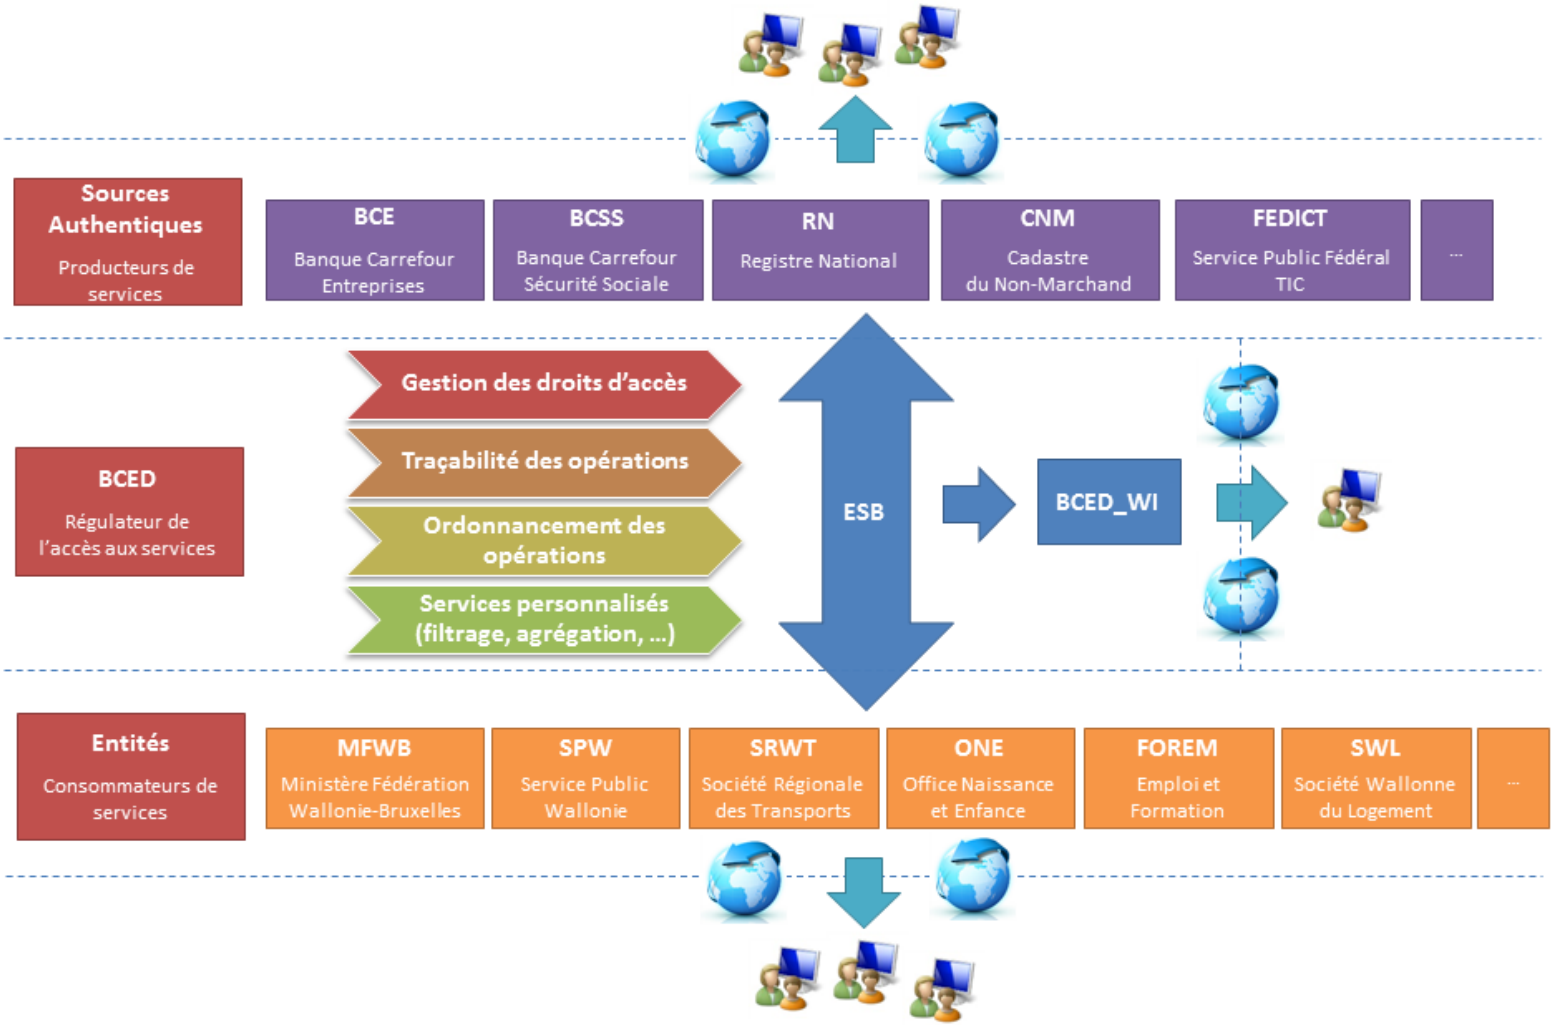

- BCED stands for Banque Carrefour d'Echange de Données

- Main missions :
  - remove complexity for users (administrations, citizens, companies, …) through **data exchange**;
  - contribute to **reuse of data** and services.
- Data are in the core of our business.

BCED
Banque Carrefour d'Échange de Données

BCED – Services integrator

BCED objectives besides interoperability

- Objectives :
  - Answer to a **need to access data**, common to several consumers;
  - With the aim of **improving service** to the user.

- Challenges:
  - **advise the data producers** in order to have usable data;
  - make the different systems **interoperable**.

BCED
Banque Carrefour d'Échange de Données

Implementation in projects

- 4 goals in our projects :
  - Data quality;
  - Data governance;
  - Legal base;
  - Operational capacity.

- Incremental approach

Interoperability wishes

Projects examples

- Global vision of the « nonprofit » employment in Wallonia
  - Base registry : non-profit organisations.
- Companies environmental profile
  - Some base registries needed (like SEVESO companies).
- Repository of graduates
- Small and medium-sized businesses

Challenges

Challenges

- Heterogeneity of :
  - data quality (syntax, semantics or structure);
  - data management (ambiguous identification, ...);
  - systems (sometimes no system);
- Mentalities : need change management.
- Adequate funding : need budget shifts.

Directions / Solutions

Legal base

- Cooperative agreement between Wallonia and « Wallonia-Brussels » Federation to ensure :
  - “Only once” principle and the use of base registries;
  - Interoperability assuring authentic information exchange.

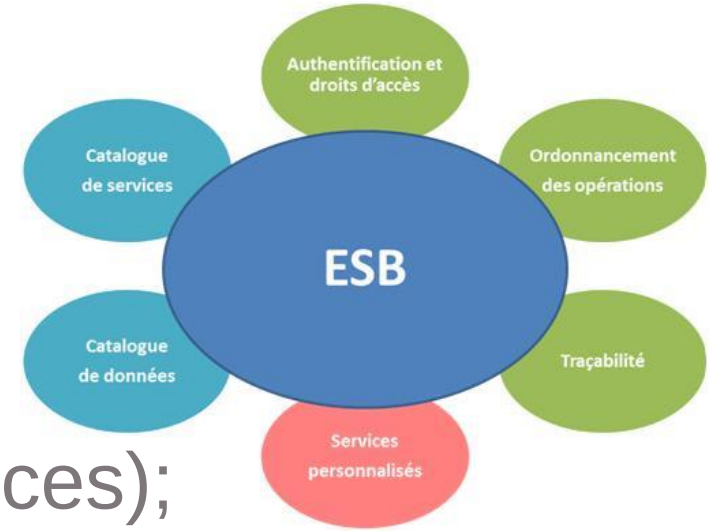

BCED
Banque Carrefour d'Échange de Données

Organisational trend

- Willingness to share information
  - Not based only on a political will;
  - Based on real needs;
  - Wish to better manage data.
- Choice of priorities
- Awareness
  - Data sharing.
  - Data governance and quality.
  - Interoperability by design.

BCED
Banque Carrefour d'Échange de Données

Technical options (BCED and ICT services)

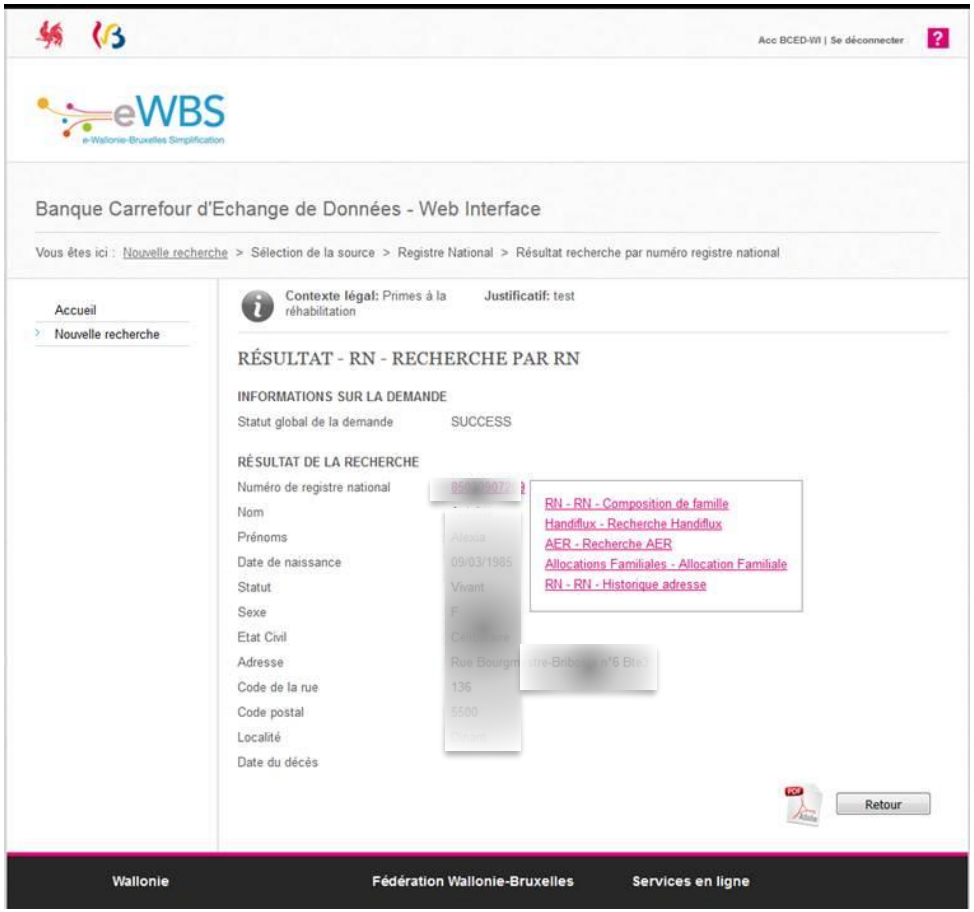

- Use of an ESB to allow systems interoperability (and particularly dataservices);
- Security services through the ESB;
- Definition of SLA;
- A real support of IC T service to use and construct base registries using :
  - Master data management;
  - Service Oriented Architecture.
