5-star Linked Open Address Registry

Interop Summit 2018 – Brussels

INFORMATIE VLAANDEREN

BASE REGISTRIES

Base registries are the cornerstone of European public service delivery

*A base registry is a **trusted and authoritative source of information** which can and should be digitally reused by others,*
*where **one organisation is responsible** and accountable for the collection, use, updating and preservation of information.*
*Base registries are **reliable sources of basic information** on data items such as people, companies, vehicles, licences, buildings, locations and roads.*
*This type of information constitutes the **'master data' for public administrations and European public service delivery.***

Base Registries

"cornerstone for user friendly public service delivery"

Vision

Develop and distribute data sources that contain core objects for public service delivery

Core objects will be used across departments, administrations, policy domains, administrative levels and the private sector

Highest quality, legal governance, ready for re-use, available in a semantic coherent framework

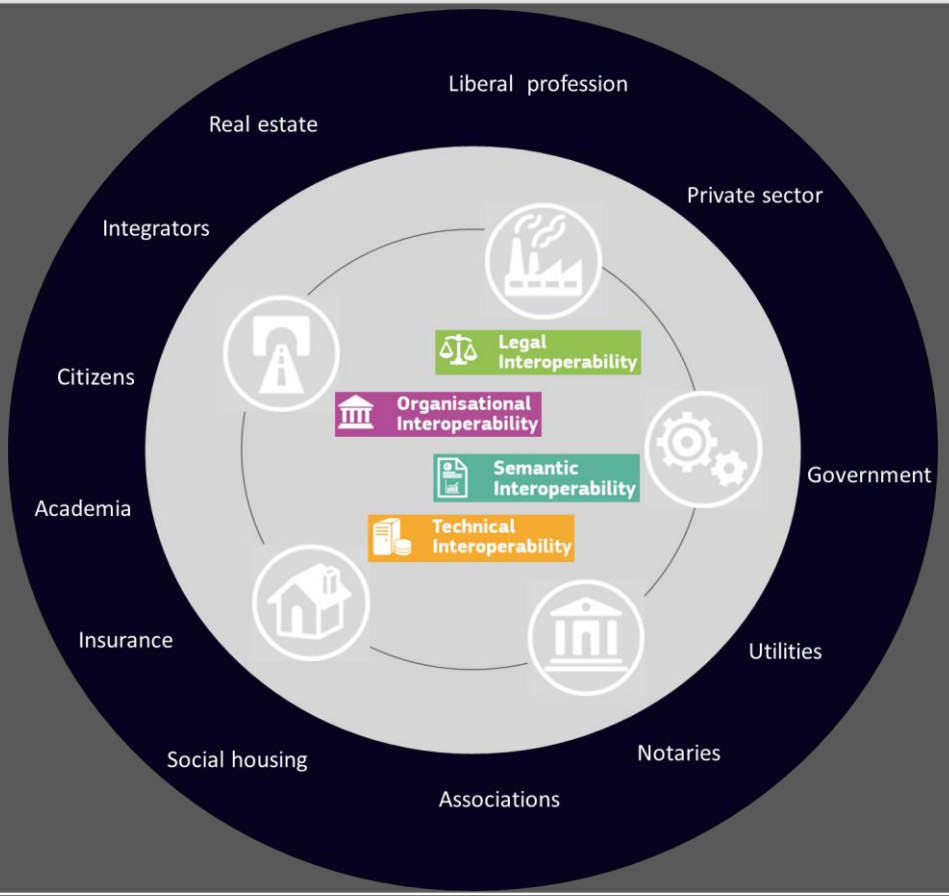

benefits

Efficiency
integrated public service delivery at a reduced investment cost

Relevance
re-use of the correct data within a formal legal framework

Transparancy
better policies because of integrated information

Customer-focus
Once Only Principle reduces administrative burden

Address Registry

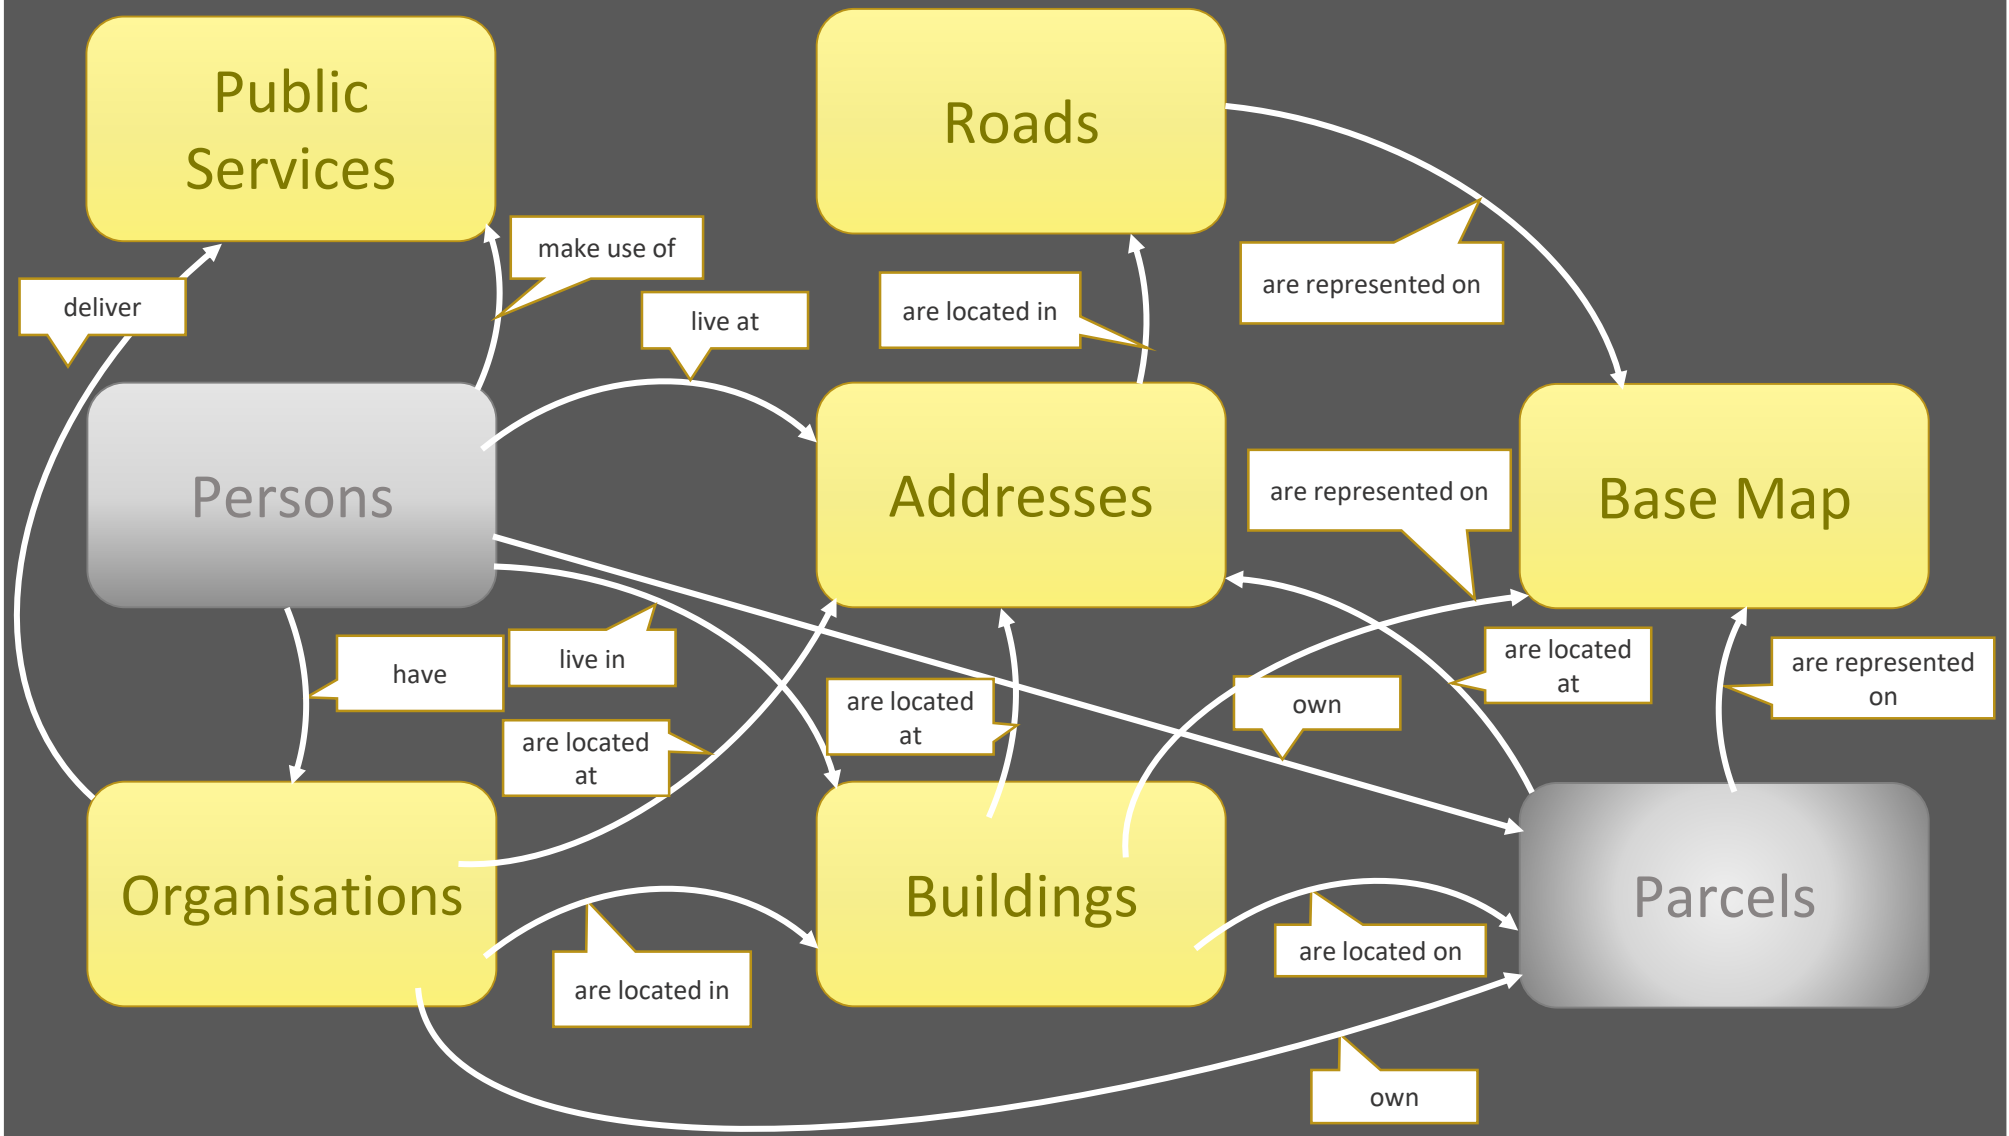

Building Registry

Organisation Registry

Public Service Registry

Road Registry

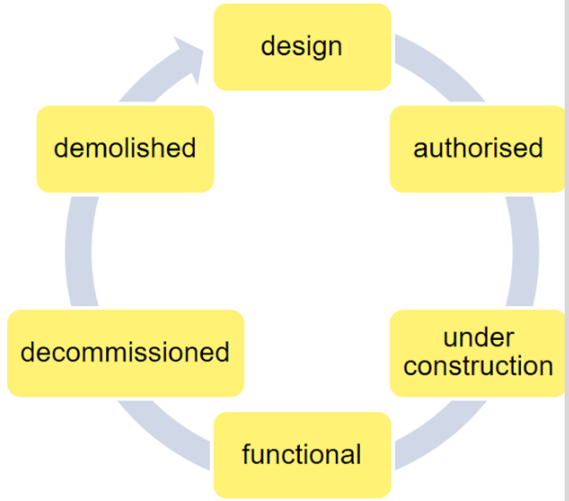

Base Registries

BASE REGISTRIES

Base Registries Concept

- Registers only contain core information
- Data in Registries work together
- Persistent identifiers / lifecycle
- Compulsory use and error reporting

Address Registry

- ✓ >4 million addresses
- ✓ geographical coordinates
- ✓ synchronised in real time between 308 local governments
- ✓ Open Data

Compulsory Use

Products

- CRAB-stratenlijst
- CRAB-adresposities
- CRAB-adressenlijst
- xGRAB

Webservices

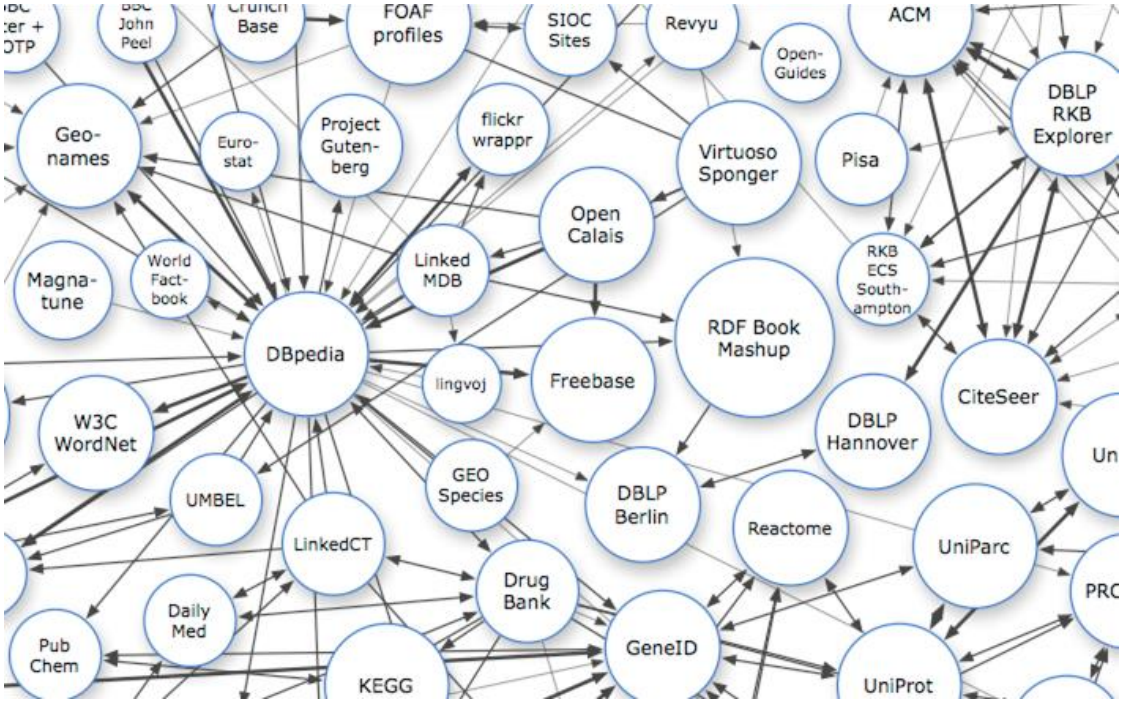

- WS-CRAB
- CRAB WS-T
- Geolocation
- CRAB Edit
- CRAB Read
- CRAB OGC
- CRAB Melding
- CRAB Match

Linked Open Data

- CRAB RDF-dump
- CRAB SPARQL-endpoint
- CRAB Subject Pages
- CRAB Linked Data Fragments (Beta)
