Agenda

- eIDAS – Regulation (EU) n°910/2014
  - Chapter II – chapter III
  - Summary of the Regulation
- Levels of Assurance (LoA) 2015/1502
- Mutual recognition (art. 6)
- Notification (art. 9)
- Incoming authentications
  - Overview
  - Demo
  - Limits of the Regulation
  - Additional component
- Outgoing authentications

eIDAS - Regulation (EU) No 910/2014

On electronic identification and trust services for electronic transactions in the internal market (…)

- Chapter II: Electronic identification (FPS BOSA/DT)
  - Mutual recognition
  - Notification
  - LoA's
  - Interoperability framework
  - (…)
- Chapter III: Trust services (FPS Economy)
  - (Qualified) trust services

eIDAS - IMPLEMENTING REGULATION (EU) 2015/1502

(…) setting out minimum technical specifications and procedures for assurance levels for electronic identification means **(…)**

- Defines criteria for each LoA
  - Low / Substantial / High
- Covers several processes
  - Registration & identity proofing
  - EIM characteristics and design
  - Issuance, delivery, activation, revocation, replacement
  - Authentication
  - Management & organisation, compliance & audit
  - (…)

eIDAS – Chapter II – Electronic Identification

Mutual recognition (art. 6)

“ When an electronic identification using an electronic identification means and authentication is required under national law or by administrative practice to access a service provided by a public sector body online in one Member State, the electronic identification means issued in another Member State shall be recognized in the first Member State for the purposes of cross-border authentication for that service online, (…)”

- Obligation to recognize Electronic Identification Means (EIM)
  - ‘notified’ by other Member States (MS)
  - With a Level of Assurance (LoA) >= to the one required by the RP at the national level
  - If LoA ‘Substantial’ or ‘High’ (optional recognition for EIM with LoA ‘Low’)
- Consequence
  - National EIM have to be mapped according to these LoA

eIDAS – Chapter II – Electronic Identification

Notification (art. 9)

- Optional
- Peer-review (LoA <-> 2015/1502)
- State of play
  - Completed: DE (OJEU 26/9/2017)
  - Initiated: (pre-notified soon) IT + …
  - BE: eID card 

eIDAS – Chapter II – Electronic Identification

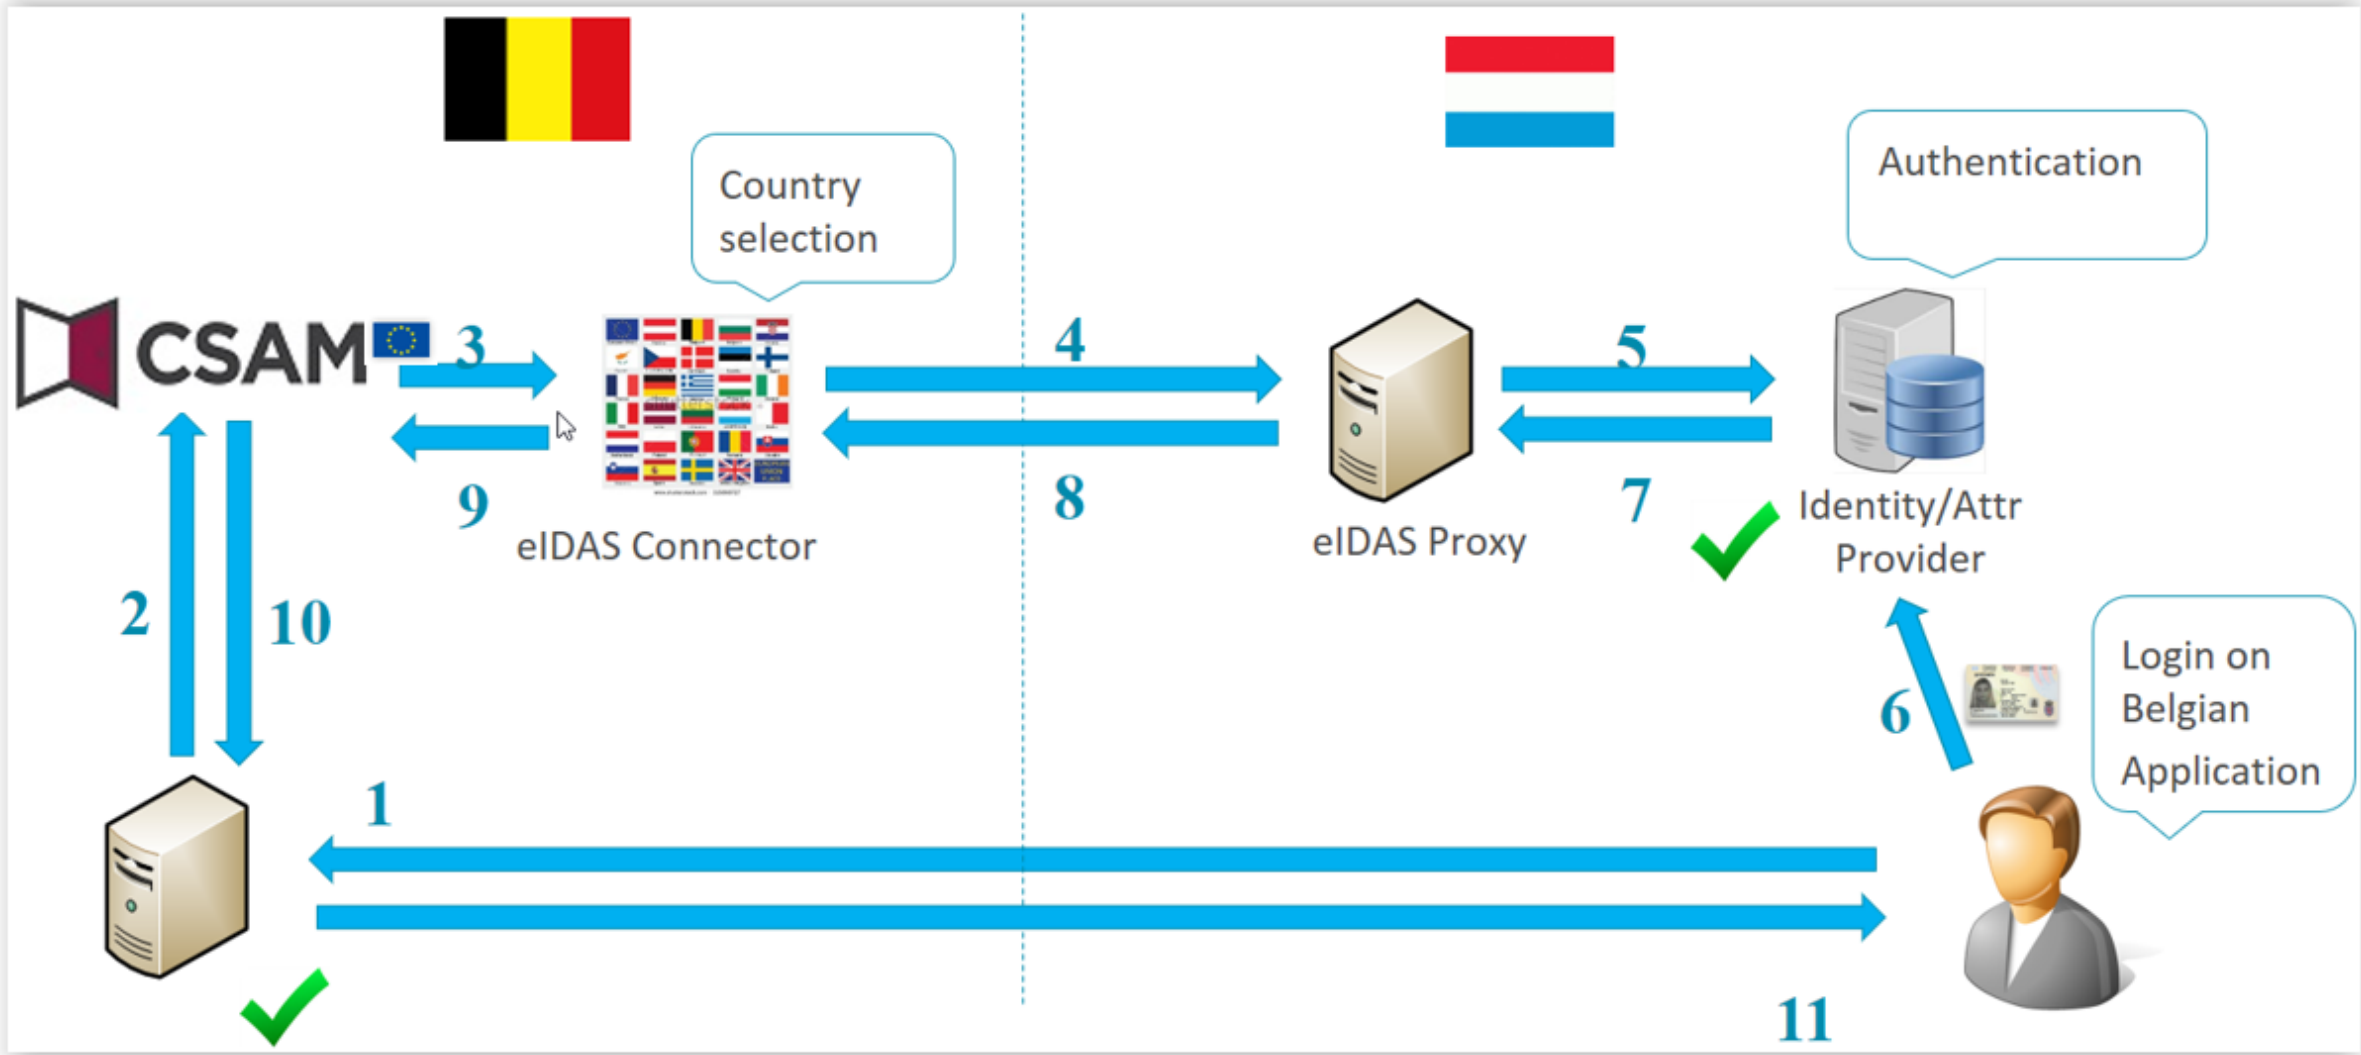

Incoming authentications (MS => BE) ⇔ Obligation to recognize

- eIDAS identifier

- Minimum dataset (natural persons)

Mandatory data	Optional data
Identifier	Name at birth
Name	Place of birth
First name	Address
Date of birth	sex

Incoming authentications - overview

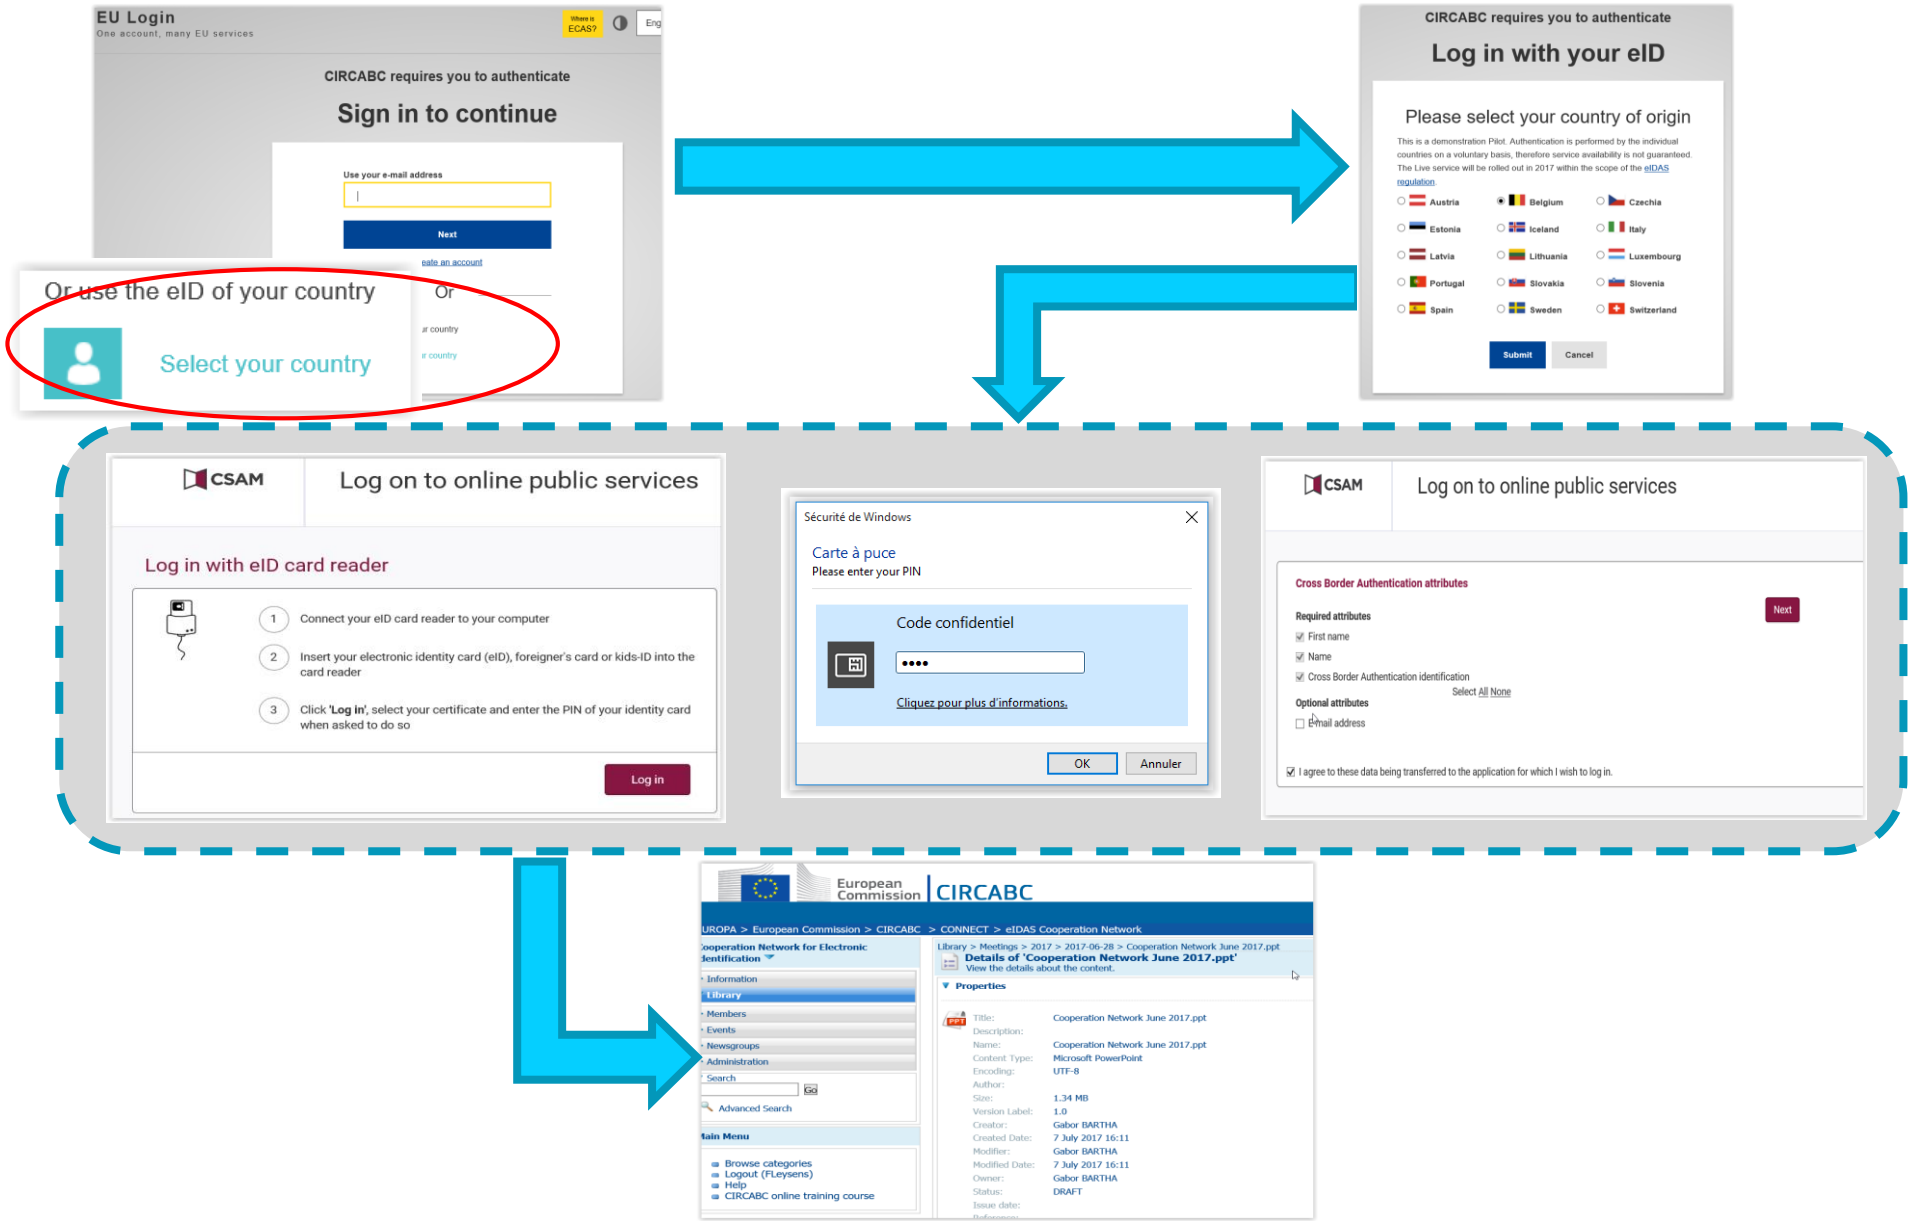

eIDAS – Cross-border authentication

Cross border authentication overview

eIDAS – Chapter II – Electronic Identification

Limits of the Regulation

- Chapter II Only covers ‘authentications’
  - Guarantees an identity
    - Identified by
      - ➢ An identifier generated by a country/identity provider
      - ➢ A ‘minimum dataset’
- Doesn’t cover what’s beyond authentication
  - Registration of those identities or mapping with an already registered person
  - Integration with Service Providers (customer applications)
  - How to manage identifier which are not unique/persistent (a user might have several eIDAS identifiers)

eIDAS – Chapter II – Electronic Identification

Additional component - Justification and functions to cover

- **1-Register & enrich** eIDAS identities related data
  - Benefits
    - FAS ‘s clients do not have to develop their own registration module …
    - Ease of integration with legacy processes: no new developments needed on the Service Provider’s side

      (ex. Current WS already do the Job to access dedicated registers [CBSS])

- **2-Map** multiple eIDAS id with a unique national identifier

  => cf. necessity to manage identities in a non ambiguous way (only once, …)

eIDAS – Chapter II – Electronic Identification

Additional component - Justification and functions to cover

eIDAS – Chapter II – Electronic Identification

Outgoing authentications (BE => MS) ⇔ Notification

- Precondition
  - BE eID scheme notification process completed
- Privacy
  - Pseudo identifiers (MS)

What was notified by a MS (LoA) has no impact on its obligation to recognize other notified EIM

Thank you!
