CONNECTING YOU TO THE **AUTHORITATIVE GEO-INFORMATION FRAMEWORK** FOR EUROPE

Official national sources of geodata

INSPIRE – opening the door to interoperable data

To do list:

- Full harmonisation
- Support further implementation
- Use principals to benefit delivery of other policies
- Consistent interpretation & reporting

A vision for future European Location Services

Drivers for European Location Services

New methods of consumption

Fulfil need for Pan-European, authoritative data

European Commission Policy

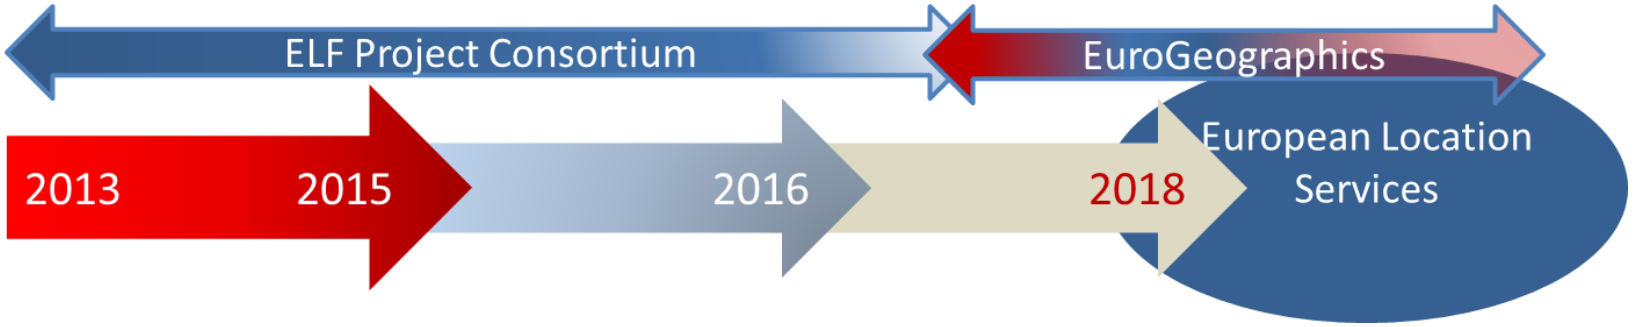

INSPIRE · Infrastructure for Spatial Information in Europe

Support Members' INSPIRE Obligations

Support Members in a global market

Building operational ELS

European Location Framework project

Established standards, tools, technical infrastructure and pilot services – the ELF Platform

Pilot products & services to defined standards (INSPIRE-compliant spatial reference data, harmonised at a cross-border and pan-European level)

Transition Programme (Oct 2016 – Oct 2018)

Build on ELF Platform and hand-over ownership of the ELF platform from ELF Consortium to EuroGeographics

Design and build operational and customer focused services with partners

Establish the organisational model for operations

Operational European Location Services

Provide reliable and efficient products/services for pan-European users

Single point of access for licensing official data on European level

Business model and business case in place

Delivery organisation decided

Operational model implemented

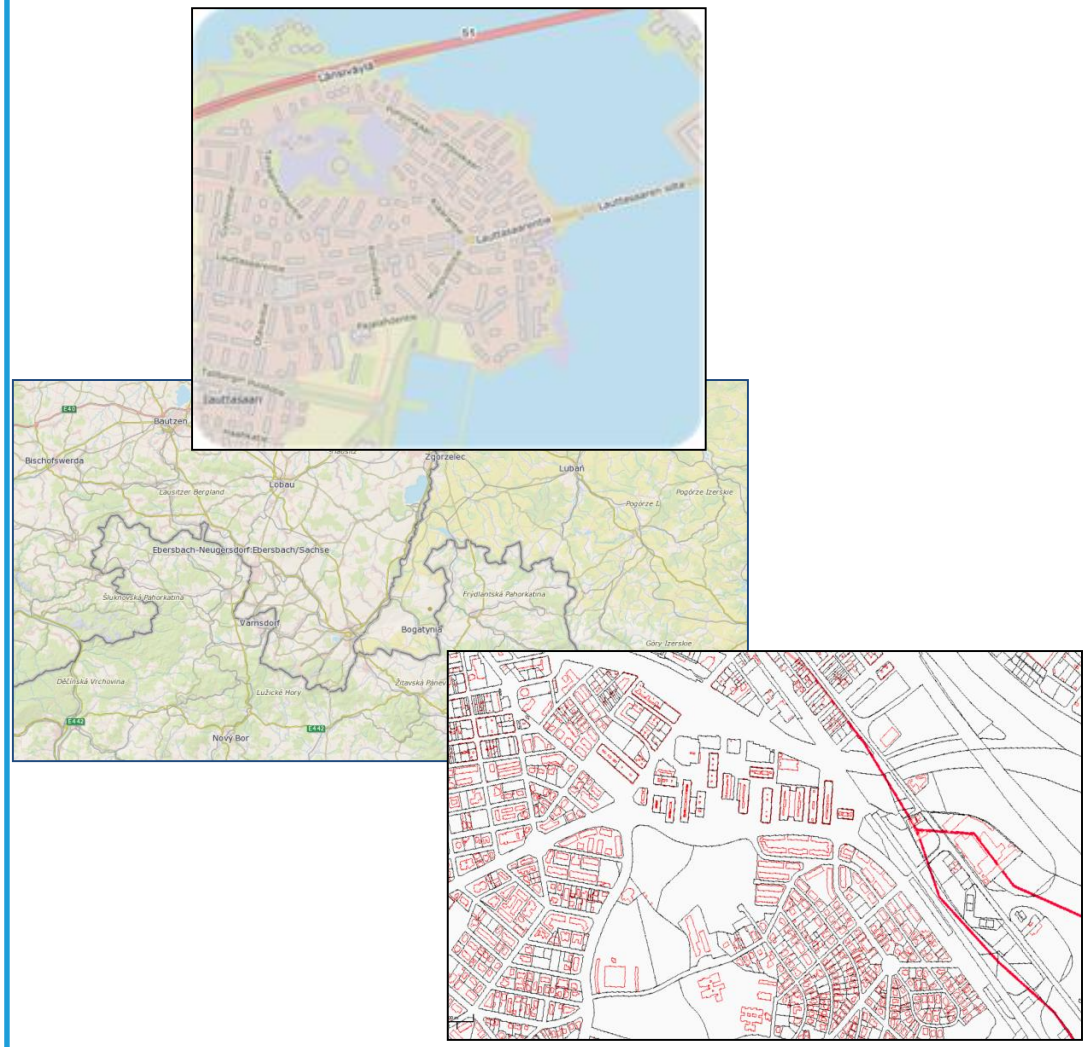

Open ELS Project

Develop & implement Open European Location Services

- Develop Open Data services for the priority domain of geospatial information from European NMCAs
- Improve the quality, availability and interoperability of data from different, cross-border public authorities, facilitating access to and encouraging the uptake and use of data
- Strongly user oriented
- Involve SMEs through a programme of engagement to encourage the SME sector to take up Open Data services and develop innovative solutions for the market

A gateway to data from official national sources

✓Gives confidence that information is consistent and comparable regardless of its national source
✓Enables data to be easily shared
✓Provides information to define, implement and analyse policies

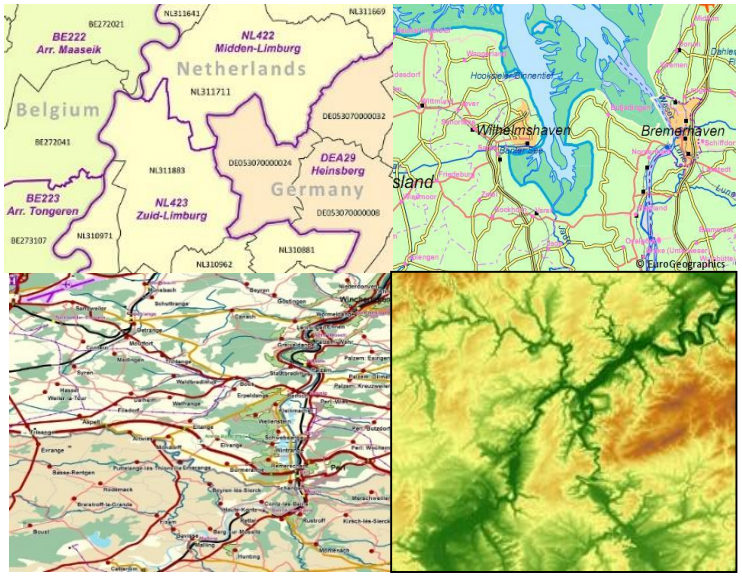

A fundamental resource for Europe

Why EuroGeographics?

- Strong track record of working in partnership
- Respected authority
- Trusted source of data & information

- Expertise in delivering harmonised products
- Know the market
- Relationships with end users & external data providers

Working in partnership

- NMCAs and others to deliver content
- The Commission
- Private sector
- Academic partners
